## February 20 – March 20, 2017 Coyote Reporting Summary

### Summary:

There was only one reported sighting this month, though there were several mentioned sightings on Nextdoor. The coyote gates have been down for most of the month as there has been little rain. This may explain the large drop in sightings.

Still I will not be surprised if we have a very busy “coyote reporting season” starting early and extending into the late summer due to the abundance of vegetation and food for the coyotes.

Date	Time	Location	Description
3/19/2017	8:45 p.m.	Rossmoor Park	In Rossmoor Park near the buildings. Coyote was headed toward the buildings walking through the park heading south-east toward Pemberton.

Please report all coyote activity to: <http://RossmoorWildlife.org/report>
