March 20 – April 18, 2017 Coyote Reporting Summary

Summary:

There was only one reported sighting this month, though there were a couple mentions on Nextdoor. The coyote gates have been down for most if not all the month. The limited sightings could be due to the breeding/nesting season along with the gates being down.

Still I will not be surprised if we have a very busy “coyote reporting season” starting early and extending into the late summer due to the abundance of vegetation and food for the coyotes.

Date	Time	Location	Description
3/25/2017	1:15 a.m.	Bloom heading towards Salmon Dr.	It was a midsize coyote walking slowly down the street.

Please report all coyote activity to: <http://RossmoorWildlife.org/report>
