November 22, 2017 – December 19, 2017 Coyote Reporting Summary

Summary:

Just one report this month. It appears winter has set in.

12/6/2017	2682 Bostonian Dr	5:15 AM	Two shepherd sized coyote running down Bostonian then heading north on Martha Ann dr.
-----------	-------------------	---------	---

Recall that coyotes are simple. They seek food, shelter, and water. There is no real way for Rossmoor to eliminate “water” from the list. Shelter for the most part is not available in Rossmoor. So, it comes down to food sources. As long as there are convenient food sources in Rossmoor and the coyotes can get into Rossmoor, they will be here. There’s not an effective way to keep them out beyond the coyote gates that are very effective, but not a complete solution. Coyotes enter Rossmoor via streets and storm drain channels, primarily from the east.
